

IMPORTANT ANNOUNCEMENT – INDIAN ROBOT OLYMPIAD

Due to overwhelming response from all the participants for Indian Robot Olympiad from this year onwards i.e. IRO 2011, we are undergoing some changes the way in which we evaluate our national champion for Indian Robot Olympiad.

To ensure fair and equal judgment to all teams participating in all the three regions who vie for WRO Place we will be introducing a new judgment process. We will be having Regional winners in all the three location and a consolidated score of the top 12 team will be published on our website after that last regional competition on the basis of their respective score. This 12 national winner team will be eligible to participate in WRO competition

IRO management has decided with this new judgment process as we felt that loads of deserving teams which perform really well in their respective zone couldn't vie for WRO place. We have decided with this new process to ensure that the best team should represent India in WRO at Abu Dhabi .

We hope that this will ensure that best team will come forward.

We will be video shooting all the events to ensure transparency in the scoring and judgment process , we will be uploading the videos of top three national winner in our website after the competition.
